

SALEM SCHOOL

Dear Parent/Guardian,

Once again, the Salem School Nurse and Administration are asking for your help. Before sending your child to school, please be sure they are free from contagious conditions, such as, nits, head lice, ringworm and impetigo. If you find that one of these conditions exists, we ask that you seek appropriate medical treatment, and notify the school nurse. Best medical practice suggests that all students need to be treated and cleared prior to returning to their classrooms.

We ask that you do not send your child to school if they have had a fever of 100 degrees or above, had recently vomited, or had diarrhea, within the last 24 hours to enable Salem School to adhere to Infection Control guidelines. Children should be symptom free before they are sent back to school to prevent the passing of illnesses to other healthy students and staff.

We appreciate your help. Your cooperation will help keep our schools clean and our children healthy.

Please remember the administration of any medication can only be given with a written order from a family physician and written parental permission. This includes cough drops, Tylenol and Ibuprofen. Forms are available through the school nurse. Medications must be brought to the school nurse by a parent or guardian in a pharmacy-labeled bottle or the original container. New orders need to be written at the beginning of every school year.

The nurse can apply, Bacitracin, Vaseline, Hydrocortisone, Calamine Lotion and antiseptic wipes at her discretion. If you do not want your child to receive any of these treatments during school, please provide a written a note of refusal.

Please also remember excuses from gym or recess will be granted upon receipt of a written statement from the child's physician. Crutches and other appliances in school also need written orders from a physician outlining any and all restrictions and/or interventions that are necessary to keep an injured student safe.

Thank you,
Maggie Clouet, RN, MSN

Salem School Nurse
